MESSAGE FROM THE DIRECTOR

At ASOCSA, we believe that building is not merely a profession — it is an act of trust. Every project we undertake is born from the commitment to create something lasting, something that brings well-being and opens real opportunities for people.

Throughout my life, I have learned that engineering, when practiced with purpose, has the power to change destinies. I have seen how a thoughtfully designed space can unite a community; how a well-executed project can restore hope; how a technical solution can become a bridge to the future.

That conviction is what guides ASOCSA. It is not only about delivering projects, but about carrying them out with integrity, excellence, and deep respect for those who will ultimately benefit from them.

Today, the company I lead is built upon a team that understands engineering can also inspire — that every decision matters, and that true modernity lies not only in technology, but in the sensitivity with which we build.

It is my aspiration that every project reflects that spirit:
to build inspiration that transforms lives, wherever the future may lead us.

Omar Otálora
General Director – ASOCSA

OUR HISTORY

We were born opening roads in the remote territories of Colombia, where engineering required the union of technical expertise, character, and courage. Upon arriving in Panama, we understood that building is also an act of service — and that we could look further: toward rural areas, indigenous regions, and remote communities where needs were urgent.

There, we delivered healthcare centers, aqueduct systems, bridges, and spaces that restore dignity, access, and real opportunities.

Forty-five years building across Latin America, Africa, and the Middle East have strengthened our deeply human vision, our resilience, and a modern way of understanding engineering — one that is close, responsible, and conscious of the impact it leaves behind.

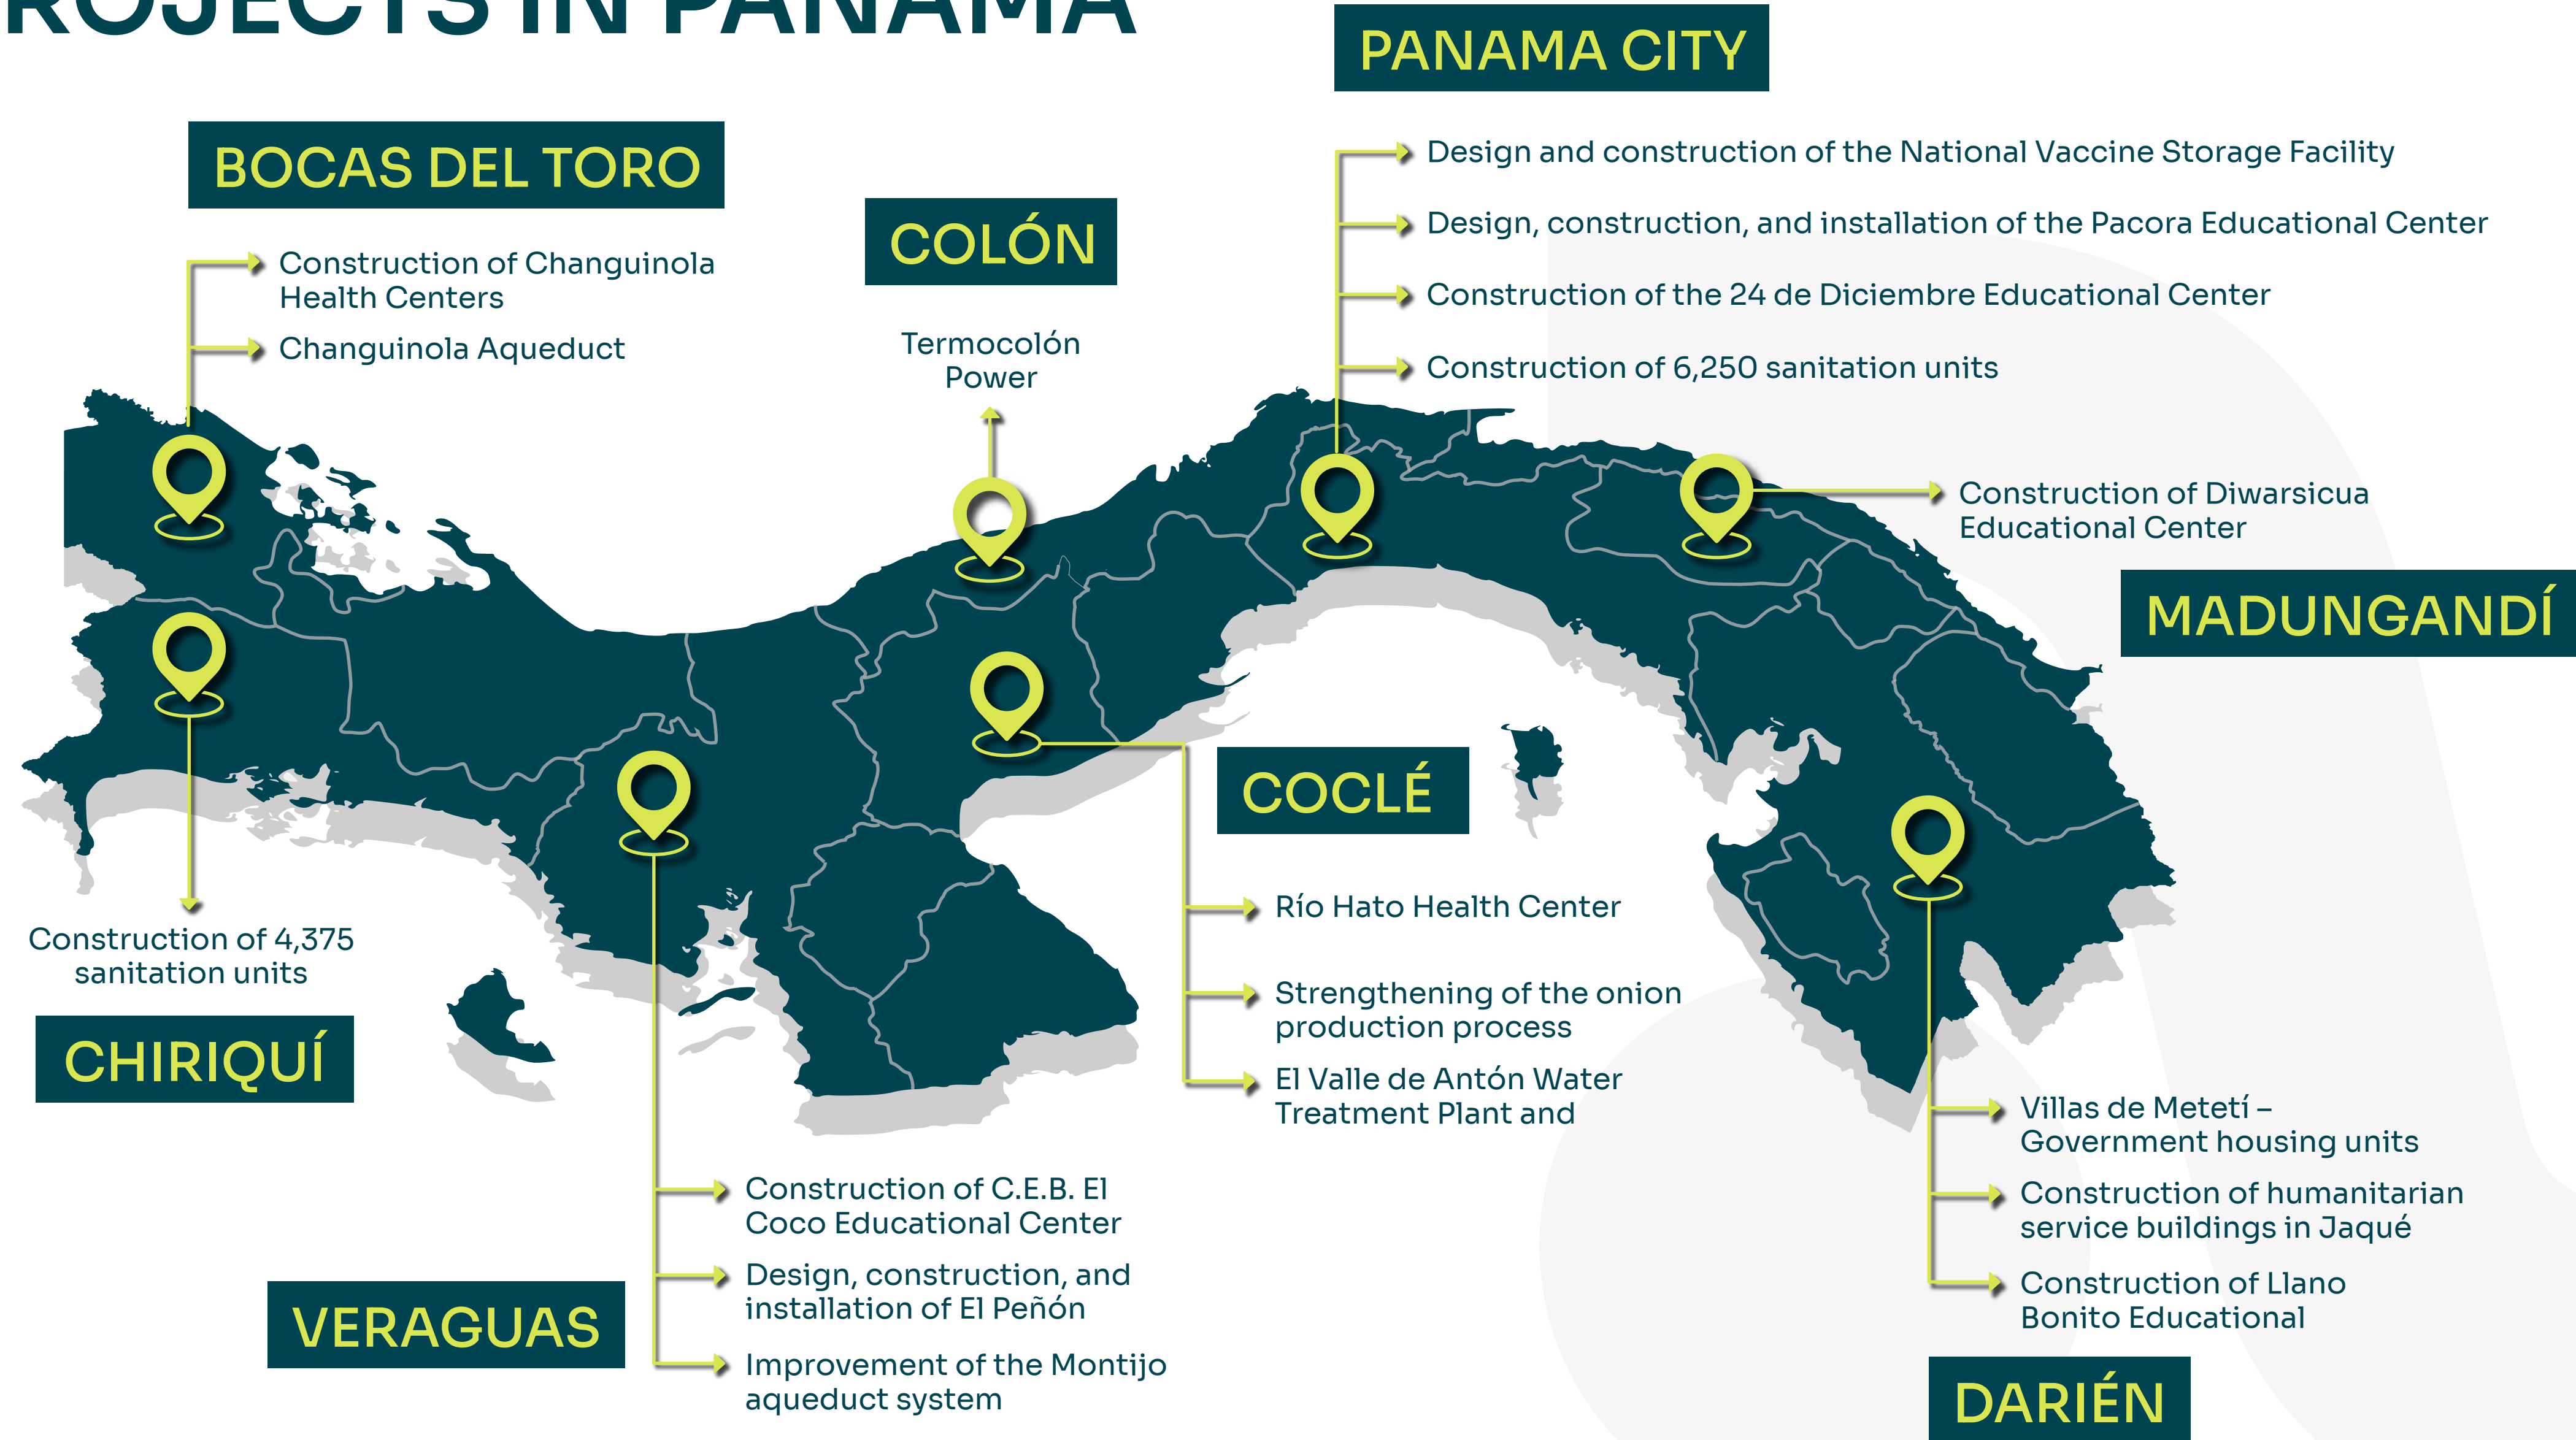

Today, we are a Latin American company with global experience. A firm that combines technical excellence with human sensitivity, innovation with commitment, and performance with purpose — delivering projects that inspire confidence. Projects that drive well-being. Projects that create the future.

PROJECTS IN PANAMA

TECHNICAL AND OPERATIONAL CAPABILITIES

Nuestra experiencia multidisciplinaria nos permite ejecutar proyectos complejos con altos estándares de calidad, seguridad y eficiencia. Nos especializamos en:

WATER AND SANITATION

**HEALTHCARE
INFRASTRUCTURE**

**PUBLIC WORKS AND
SOCIAL INFRASTRUCTURE**

**URBAN AND ROAD
INFRASTRUCTURE**

**COASTAL AND PORT
INFRASTRUCTURE**

**HOUSING AND
COMMUNITY SPACES**

ACCREDITATIONS & INTERNATIONAL STANDARDS

At ASOCSA, excellence is built on standardized processes and a comprehensive commitment to quality, environmental responsibility, and safety. We have an Integrated Management System covering the ISO 9001, ISO 14001, and ISO 45001 certifications, awarded by International Global Certification.

This recognition ensures a structured and consistent approach to project management, focused on meeting the highest international standards. From our headquarters in Panama, we coordinate operations under rigorous criteria for quality, sustainability, and safety, ensuring that every project, regardless of its location, stands as a benchmark of technical excellence, responsibility, and reliability.

DISCOVER SOME OF OUR KEY PROJECTS.

Water and Sanitation

\$ 106.829.149,78 USD

Healthcare Infrastructure

\$ 204.758.487,51 USD

Public and Social Works

\$ 107.332.251,5 USD

Coastal and Port Infrastructure

\$ 19.804.395,12 USD

Housing and Community Spaces

\$ 20.762.405,2 USD

ANTÓN VALLEY

Water and Sanitation

Study, design, and construction of the potable water supply system in Valle de Antón, Coclé Province.
